

PPT - schimbare spelling default

Deschidem prezentarea dorita

In meniul Review observam un nou buton "SetLanguageFromSelection" in tab-ul Language Default.

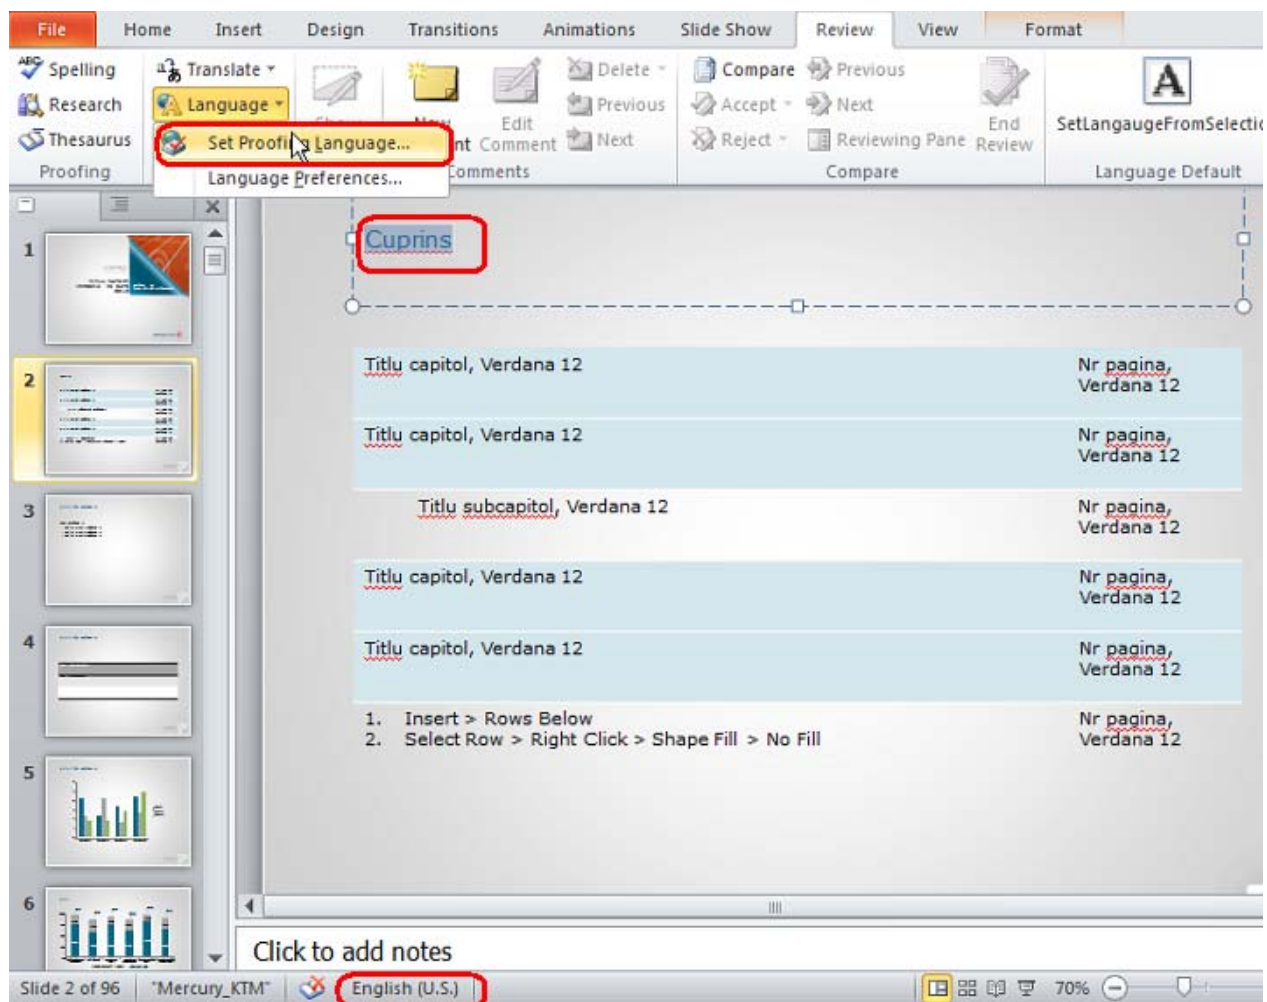

- prezentarile template (cele mercury), ca setare default sunt cu spelling in engleza

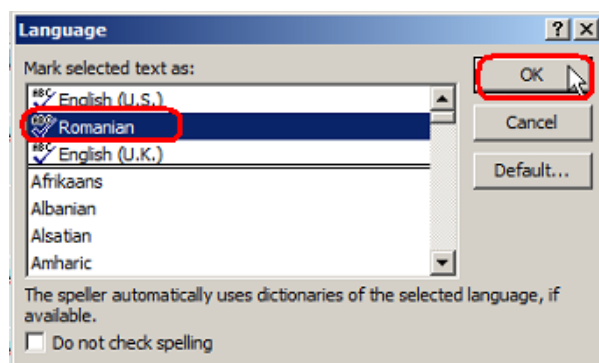

Daca dorim ca speling-ul default sa fie setat in RO pt. tot documentul trebuie sa:

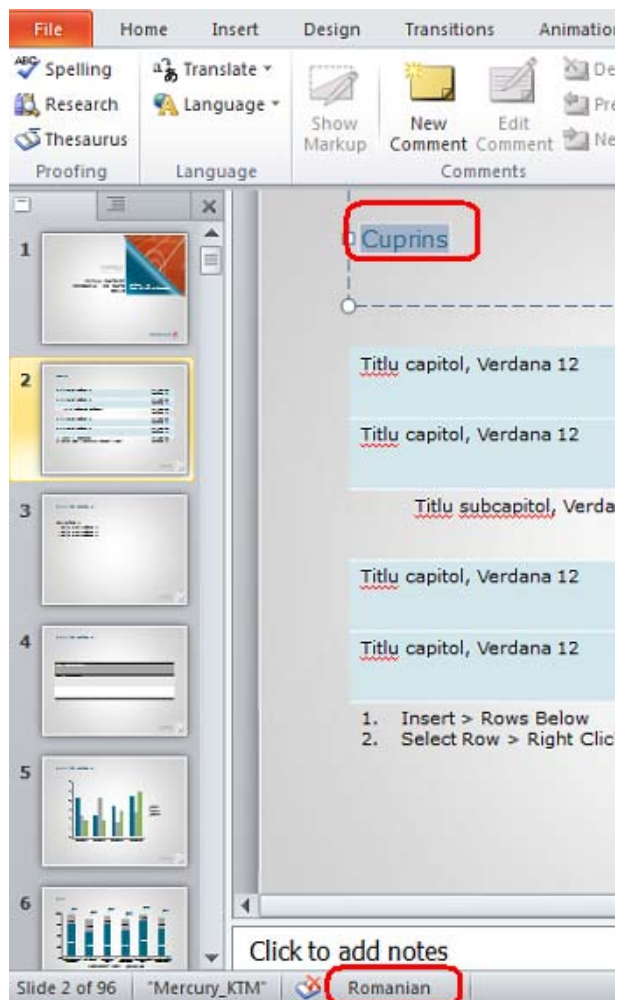

- selectam un text dintr-un textbox si setam spelling-ul in RO pentru acel text
- !!Atentie!!! textul selectat trebuie sa fie neaparat dintr-un textbox simplu,....NU merge daca selectam text din tabele**
- in cazul nostru selectez textul "Cuprins"
- din tabul "Language" selectez "Set Proffing Language....."

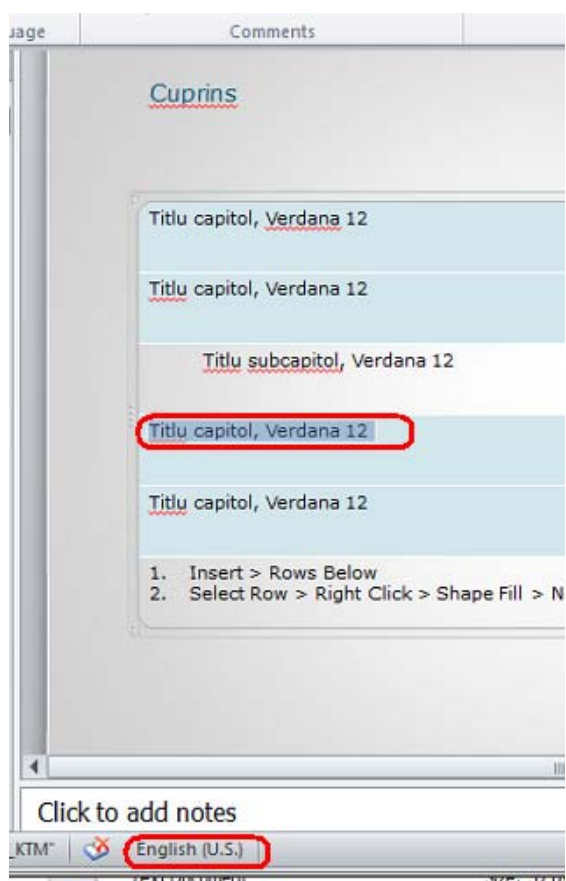

- in urmatoarea fereastra selectam limba dorita,..in cazul nostru Romanian si OK

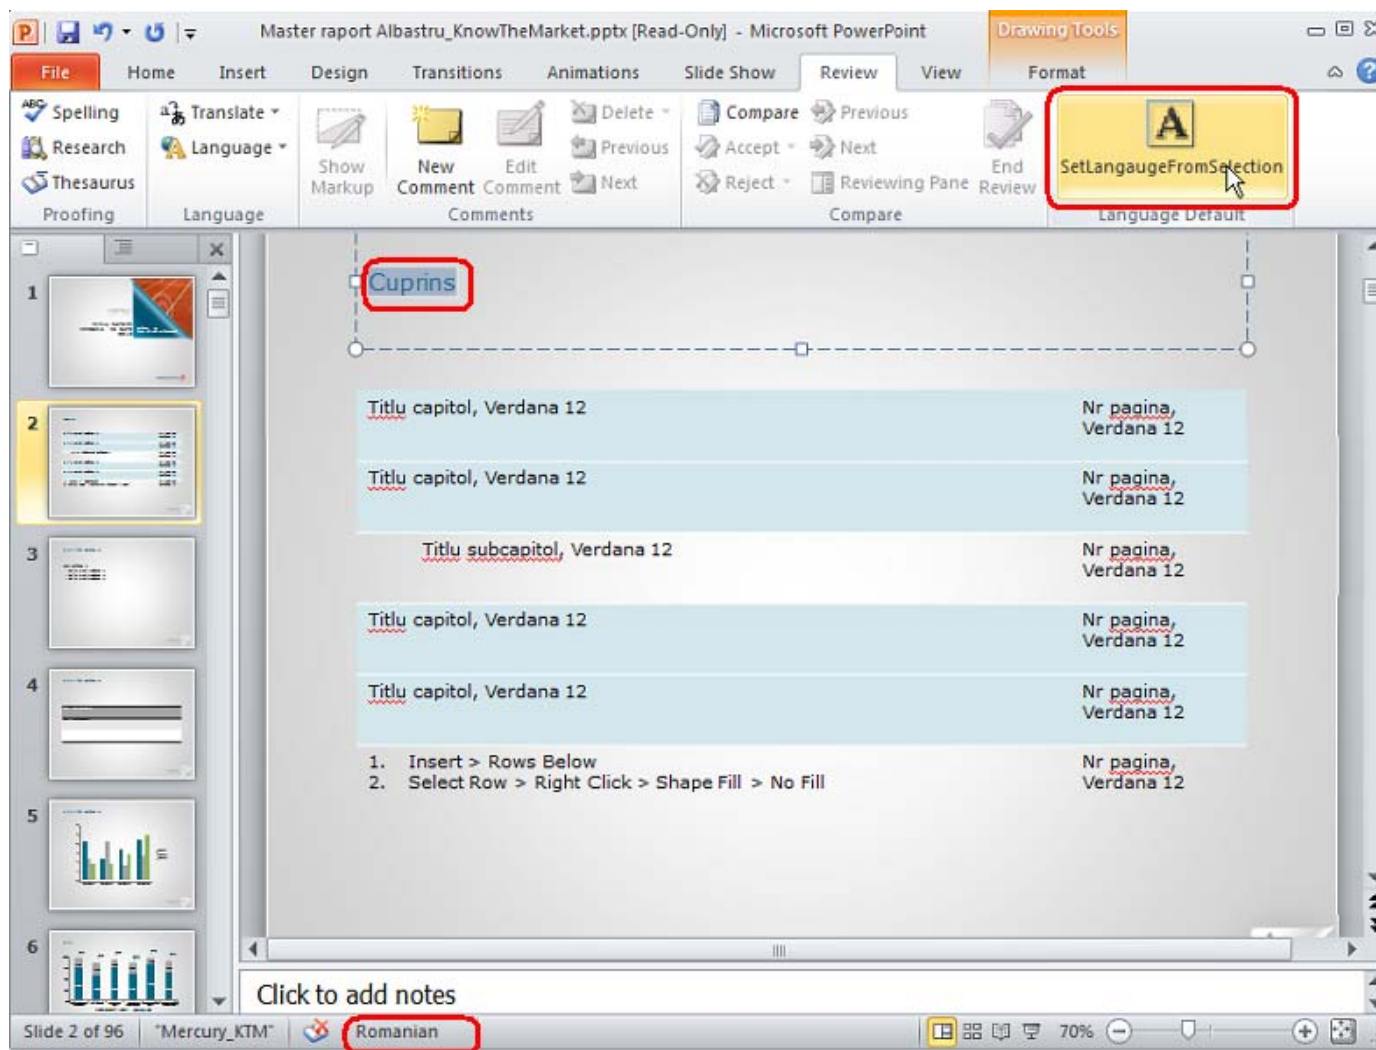

- acum vom observa ca textul selectat este marcat cu speling in RO

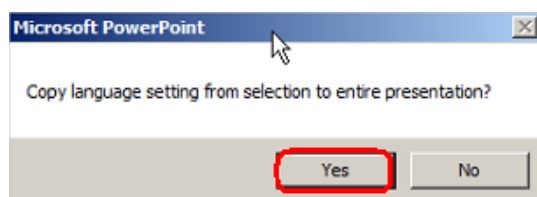

- !!!Atentie!!! acum doar textul respectiv ("Cuprins") este setat pt. spelling in RO
- daca selectam alt text din prezentare vom vedea ca spelling-ul a ramas tot pe EN

- pentru a aplicat setarea pt. spelling in RO pentru tot documentul selectam textul respectiv pe care tocmai l-am schimbat in RO iar din meniul "Language Default" selectam butonul "SetLanguageFromSelection"

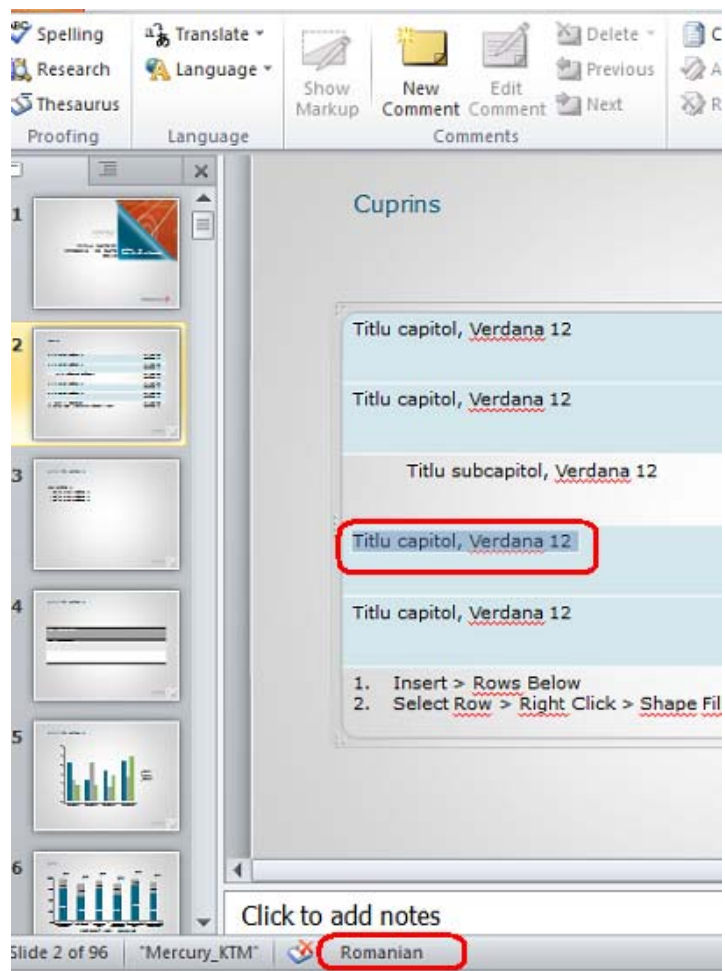

- confirmam selectant Yes

- acum tot documentul va avea spelling-ul setat in RO

- ca verificare putem selecta un text care inainte era marcat cu spelling in EN si vom observa ca s-a modificat in RO

Pentru mai multe info,..103 sau 106,
